

SNS GUARDS' RULES

SECURITY POLICY

SNS Ltd has established security objectives at relevant functions and levels, with the aim of managing risk by reducing the probability of events, minimizing the effects of incidents and mitigating the consequences by adequate preparation and resilience.

Objectives regarding security policy implementation include:

- Assessing and monitoring the security aspects of all PCASP and shore based premises
- Establishing safeguards against identified risks
- Complying with National, International and flag state administrative requirements as applicable
- Avoiding security incidents that could cause human injury, loss of life or damage to the ship, the property and assets under its control.
- Ensuring fast, secure and efficient exchange of security related information.
- Protecting physical and information technology (IT) assets
- Enhancing efforts to combat piracy.
- Enhancing the capability of the PCASP to deal with the consequences of a piracy attack.
- Protecting the security of vessels and ensuring effective systems of piracy control.

In order to effectively implement this Security Policy SNS Ltd:

- Communicates established Security Policy to all interested parties
- Provides adequate resources and support / training to all PCASP.
- Implements procedures to prepare and respond to security related emergency situations.
- Designates appropriate personnel to monitor security aspects on board and ashore
- Prepares and trains shore based staff and PCASP for handling emergency situations.
- Implements all National, International and Flag State administrative requirements, while communicating such requirements to personnel through existing training

programs.

- Prevents unauthorized access to shore based premises and company records
- Cooperates with port authorities and shore based facilities and agents to enhance security level during operations and embarkation/disembarkation of the PCASP.
- Gathers information with respect to security threats and promotes information exchange regarding security incidents.
- Evaluates and continually improves the security processes / measures followed, by taking all necessary actions in order to identify the problem areas throughout the QSMS via Internal Audits and Management Review processes.
- Executes appropriate risk assessment studies regarding overall company operation, as well as specific transits undertaken, while maintaining awareness for systematic review of risk assessment adequacy

All Company employees, shore based and PCASP are familiarized with this Security Policy through training procedures and are responsible for implementing and meeting its' objectives. SNS Ltd Top Management is responsible for monitoring and reviewing Security Policy on a regular basis in order to ensure that it remains relevant to the established objectives and effective.
